JOURNAL OF THEORETICAL BIOLOGY

Chief Editor: J. F. DANIELLI
Associate Editor: L. WOLPERT

Editorial Board:
E. A. BARNARD
H. BREMERMANN
M. CALVIN
J. D. COWAN
N. GOEL
B. GOODWIN
J. MAYNARD SMITH
M. YČAS
J. Z. YOUNG

VOLUME 63

November to December 1976

ACADEMIC PRESS
London New York San Francisco

H301
J75

Contents of Volume 63

Number 1, November 1976

CHILDS, R. E. and BARDSLEY, W. G., An Analysis of Non-linear Eadie-Hofstee-Scatchard Representations of Legand-binding and Initial-rate Data for Allosteric and other Complex Enzyme Mechanisms 1

ROSEN, R., Structural Stability, Alternate Descriptions and Information 19

SMYTHIES, J. R., BEATON, J. M., BENINGTON, F., BRADLEY, R. J. and MORIN, R. F., On the Molecular Mechanism of Interaction Between the Neurophysins and Oxytocin and Vasopressin . . 33

ELTON, R. A. and FIERS, W., Rhythmic Variations in Purine Run Frequencies in Bacteriophage RNA 49

COLDING-JØRGENSEN, M., A Description of Adaptation in Excitable Membranes 61

MILLER, C. E., THOMPSON, S. and LOZAR, J., A Theoretical Evaluation of Cardiac Output as a Function of Mean Arterial Pressure in the Human Cardiovascular System 89

DENIZEAU, F., WYSE, J. and SOURKES, T. L., Kinetics of Multiple Transport Systems for Amino Acids in the Brain 99

ERHAN, S., Information Density, Cellular Immunity and Transfer Factor 111

KANG, S., BERGAMINI, M. V. W. and HASEN, M., Conformation of *N*-formyl-1, 3-dihydroxy-Δ^{31}-pentene, a Model Compound of Sphingomyelin 117

BENHAM, C. J. and KOZAK, J. J., Denaturation: an Example of a Catastrophe II. Two-state Transitions 125

SATO, S., and TSUKAHARA, N., Some Properties of the Theoretical Membrane Transients in Rall's Neuron Model 151

SHIMIZU, H., YAMADA, T., NISHIYAMA, K., and YANO, M., The Synergetic Enzyme Theory of Muscular Contraction: II Relation between Hill's Equations and Functions of Two-headed Myosin . 165

FABREGA, H., JR., The Biological Significance of Taxonomies of Disease 191

ADAMS, W. B., Upper and Lower Bounds on the Non-linearity of Summation of End-plate Potentials 217

LETTERS TO THE EDITOR

PURVES, R. D., Microelectrodes in Spherical Cells . . . 225

MACKAY, A. L., A Gyro-chemical Effect? 229

PERELSON, A. S., Remarks on Conservation of Mass in Open Chemical Reaction Systems 233

KACSER, H., The Proper Solutions of Kacser's Developmental Model 239

Number 2, December 1976

NEWS ITEM 243

SMITH, J. MAYNARD., A Short-term Advantage for Sex and Recombination through Sib-competition 245

VENZL, G., Statistical Fluctuations of Activity in Localized Neural Populations 259

NOLDUS, E. J., Optimal Control Aspects of Left Ventricular Ejection Dynamics 275

SEATON, B., The Detection of Periodicity in Irregular Data . . 311

BARDSLEY, W. G. and WAIGHT, R. D., Primary Kinetic Isotope Effects in Enzyme-catalysed Reactions. A Theoretical Treatment and New Experimental Methods of Study 325

VON HEIJNE, G. and BLOMBERG, C., Kinetic Aspects of the DNA Helix—Cruciform Transition 347

SHYMKO, R. M. and GLASS, L., Cellular and Geometric Control of Tissue Growth and Mitotic Instability 355

SAUNDERS, P. T. and HO, M. W., On the Increase in Complexity in Evolution 375

BUSH, A. W. and COOK, A. E., The Effect of Time Delay and Growth Rate Inhibition in the Bacterial Treatment of Wastewater . . 385

DEMETRIUS, L., Measures of Variability in Age-structured Populations 397

GREIG, R. G. and JONES, M. N., The Possible Role of Steric Forces in Cellular Cohesion 405

GARAY, R. P., Thermodynamic Restrictions on the Allosteric Models Through an Analysis of the Free Energy of Interaction Between Sites 421

STEELE, J., Application of Theoretical Models in Ecology . . . 443

KUBO, K., A View on the Equivalence Point in the Precipitin Test . 453

LETTER TO THE EDITOR

TREISMAN, M. and DAWKINS, R., The "Cost of Meiosis": Is There Any? 479

Index to Volume 63

ADAMS, W. B., Upper and lower bounds on the non-linearity of summation of end-plate potentials, 217

Adaptation in excitable membranes, description of, 61

Allosteric and other complex enzyme mechanisms, an analysis of non-linear Eadie-Hofstee-Scatchard representations of legand-binding and initial-rate data for, 1

Allosteric models, thermodynamic restrictions on, through an analysis of the free energy of interaction between sites, 421

Amino acids in the brain, kinetics of multiple transport systems for, 99

Analysis of non-linear Eadie-Hofstee-Scatchard representations of legand-binding and initial-rate data for allosteric and other complex enzyme mechanisms, 1

Application of theoretical models in ecology, 443

Arterial pressure, mean, in the human cardiovascular system, a theoretical evaluation of cardiac output as a function of, 89

Bacterial treatment of wastewater, the effect of time delay and growth rate inhibition in, 385

Bacteriophage RNA, rhythmic variations in purine run frequencies in, 49

BARDSLEY, W. G. and WAIGHT, R. D., Primary kinetic isotope effects in enzyme-catalysed reactions. A theoretical treatment and new experimental methods of study, 325

BARDSLEY, W. G. (see CHILDS, R. E.), 1

BEATON, J. M. (see SMYTHIES, J. R.), 33

BENHAM, C. J. and KOZAK, J. J., Denaturation: an example of a catastrophe II. Two-state transitions, 125

BENINGTON, F. (see SMYTHIES, J. R.), 33

BERGAMINI, M. V. W. (see KANG, S.), 117

Biological significance of taxonomies of disease, 191

BLOMBERG, C. (see VON HEIJNE, G.), 347

BRADLEY, R. J. (see SMYTHIES, J. R.), 33

BUSH, A. W. and COOK, A. E., The effect of time delay and growth rate inhibition in the bacterial treatment of wastewater, 385

Cardiac output as a function of mean arterial pressure in the human cardiovascular system, theoretical evaluation of, 89

Cardiovascular system, human, a theoretical evaluation of cardiac output as a function of mean arterial pressure in, 89

Cellular and geometric control of tissue growth and mitotic instability, 355

CHILDS, R. E. and BARDSLEY, W. G., An analysis of non-linear Eadie-Hofstee-Scatchard representations of legand binding and initial-rate data for allosteric and other complex enzyme mechanisms, 1

Cohesion, cellular, the possible role of steric acids in, 405

COLDING-JØRGENSEN, M., A description of adaptation in excitable membranes, 61

Conformation of *N*-formyl-1, 3-dihydroxy-Δ^{31}-pentene, a model compound of sphingomyelin, 117

Cook, A. E. (see Bush, A. W.), 385
"Cost of meiosis". Is there any?, 479
Cruciform transition—kinetic aspects of the DNA helix, 347

Dawkins, R. (see Treisman, M.) (letter), 479
Demetrius, L., Measures of variability in age-structured populations, 397
Denaturation: an example of a catastrophe II. Two-state transitions, 125
Denizeau, F., Wyse, J. and Sourkes, T. L., Kinetics of multiple transport systems for amino acids in the brain, 99
Description of adaptation in excitable membranes, 61
Detection of periodicity in irregular data, 311
Disease, the biological significance of taxonomies of, 191
DNA helix, kinetic aspects of—cruciform transition, 347

Eadie-Hofstee-Scatchard representations, non-linear, of legand-binding and initial-rate data for allosteric and other complex enzyme mechanisms, an analysis, of, 1
Ecology, application of theoretical models in, 443
Effect of time delay and growth rate inhibition in the bacterial treatment of waste-water, 385
Elton, R. A. and Fiers, W., Rhythmic variations in purine run frequencies in bacteriophage RNA, 49
End-plate potentials, upper and lower bounds on the non-linearity of summation of, 217
Enzyme-catalysed reactions, primary kinetic isotope effects in. A theoretical treatment and new experimental methods of study, 325
Erhan, S., Information density, cellular immunity and transfer factor, 111
Equivalence point in the precipitin test, a view on, 453
Evolution, on the increase in complexity in, 375
Excitable membranes, description of adaptation in, 61

Fabrega, H., Jr., The biological significance of taxonomies of disease, 191

Glass, L. (see Shymko, R. M.), 355
Greig, R. J. and Jones, M. N., The possible role of steric forces in cellular cohesion, 405
Gyro-chemical effect?, 229

Hasen, M. (see Kang, S.), 117
Hill's equations and functions of two-headed myosin, relation between: the synergetic enzyme theory of muscular contraction II, 165
Ho, M. W. (Saunders, P. T.), 375

Immunity, cellular, information density and transfer factor, 111
Increase in complexity in evolution, 375
Information density, cellular immunity and transfer factor, 111
Irregular data, the detection of periodicity in, 311

JONES, M. N. (see GREIG, R. G.), 405

KACSER, H., The proper solutions of Kacser's developmental model (letter), 239
Kacser's developmental model, the proper solutions of, 239
KANG, S., BERGAMINI, M. V. W. and HASEN, M., Conformation of *N*-formyl-1, 3-dihydroxy-Δ^{31}-pentene, a model compound of sphingomyelin, 117
Kinetic aspects of the DNA helix—cruciform transition, 347
Kinetics of multiple transport systems for amino acids in the brain, 99
KOZAK, J. J. (see BENHAM, C. J.), 125
KUBO, K., A view on the equivalence point in the precipitin test, 453

LOZAR, J. (see MILLER, C. E.), 89

MACKAY, A. L., A gyro-chemical effect? (letter), 229
Mass in open chemical reaction systems, remarks on conservation of, 233
Measures of variability in age-structured populations, 397
Meiosis, the cost of. Is there any?, 479
Membrane transients, theoretical, in Rall's neuron model, some properties of, 151
Microelectrodes in spherical cells, 225
MILLER, C. E., THOMPSON, S. and LOZAR, J., A theoretical evaluation of cardiac output as a function of mean arterial pressure in the human cardiovascular system, 89
Mitotic instability, cellular and geometric control of tissue growth and, 355
Molecular mechanism of interaction between the neurophysins and oxytocin and vasopressin, 33
MORIN, R. F. (see SMYTHIES, J. R.), 33
Muscular contraction, the synergetic enzyme theory of: II. relation between Hill's equations and functions of two-headed myosin, 165
Myosin, two-headed, relation between Hill's equations and functions of: the synergetic enzyme theory of muscular contraction II, 165

Neural populations, localized, statistical fluctuations of activity in, 259
Neuron model, Rall's, some properties of the theoretical membrane transients in, 151
Neurophysins and oxytocin and vasopressin, on the molecular mechanism of interaction between, 33
NISHIYAMA, K. (see SHIMIZU, H.), 165
NOLDUS, E. J., Optimal control aspects of left ventricular ejection dynamics, 275

Optimal control aspects of left ventricular ejection dynamics, 275
Oxytocin and vasopressin, on the molecular mechanism of interaction between neurophysins and, 33

PERELSON, A. S., Remarks on conservation of mass in open chemical reaction systems (letter), 233
Populations, age-structured, measures of variability in, 397
Possible role of steric forces in cellular cohesion, 405
Precipitin test, a view on the equivalence point in, 453
Primary kinetic isotope effects in enzyme-catalysed reactions. A theoretical treatment and new experimental methods of study, 325
Proper solutions of Kacser's developmental model, 239
Properties of the theoretical membrane transients in Rall's neuron model, 151
PURVES, R. D., Microelectrodes in spherical cells (letter), 225

Rall's neuron model, some properties of the theoretical membrane transients in, 151
Recombination and sex through sib-competition, a short-term advantage for, 245
Remarks on conservation of mass in open chemical reaction systems, 233
Rhythmic variations in purine run frequencies in bacteriophage RNA, 49
RNA, bacteriophage, rhythmic variations in purine run frequencies in, 49
